DETAILED ACTION

Drawings

Figures 3-5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

 Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Applicant's admitted Prior Art (APA).

APA discloses a reluctance type resolver comprising:

a stator (1), constructed from a magnetic material, having a plurality of excitation teeth (2-9), each of which is wound by an excitation winding (14);

a rotor (11) having magnetic salient sections that are placed to oppose the excitation teeth (2-9); and

a detector for detecting the position of the rotor, by detecting a current or voltage of the excitation winding which changes with different phase in response to motion of the rotor (figure 4); wherein

the excitation winding (14) is wound on each excitation teeth (2-9) so that the magnetic fluxes through all excitation teeth (2-9) have the same direction; and

Application/Control Number: 09/887,015

Art Unit: 2834

the stator (1) includes bypass magnetic path teeth (2,6) passing a magnetic flux having a direction opposite to the direction of the excitation teeth (3-5, 7-9).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
 - 2. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over APA in view of Kitazawa (U. S. Pat. 5,757,182).

APA substantially teaches the claimed invention except that it does not show that each of the excitation windings is wound on each of the excitation teeth for a pair of adjacent excitation teeth such that the magnetic flux through each of the paired excitation teeth has directions opposite to each other, and the excitation windings for a pair of excitation teeth are connected in series.

Kitazawa discloses that each of the excitation windings (4) is wound on each of the excitation teeth (3) for a pair of adjacent excitation teeth (3) such that the magnetic flux through each of the paired excitation teeth (3) has directions opposite to each other, and the excitation windings (4) for a pair of excitation teeth (3) are connected in series. Kitazawa's invention has the purpose of eliminating harmonic-frequency components, improving accuracy.

Art Unit: 2834

It would have been obvious at the time the invention was made to modify the resolver of APA and provide it with the winding configuration disclosed by Kitazawa for the purpose of eliminating harmonic-frequency components, improving accuracy.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Guillermo Perez whose telephone number is (703) 306-5443. The examiner can normally be reached on Monday through Thursday and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor Ramirez can be reached on (703) 308 1371. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305 3432 for regular communications and (703) 305 3432 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308 0956.
